Touch

G-Touch Classic Range

The G-Touch Range provides teachers with an array of collaborative teaching opportunities. It is ideal for use in a Nursery or Primary School. The new slimline, lightweight design of the G-Touch Classic makes it ideal for use with a portable stand, and teachers benefit from the flexibility of uses. With 10-point touch technology, the G-Touch Classroom Range provide teachers with an array of collaborative teaching opportunities.

Pupils can interact directly on the screen or respond via hand held devices, whether these be phones, tablets or audience response systems. Crystal clear audio via the front facing speakers is ideal when incorporating video presentations into a lesson and the addition of a Genee Vision Visualiser allows live demonstrations to be displayed to the classroom.

All our screens are anti-glare and are visible in any environment and unlike projectors do not suffer from shadows caused by the presenter, making them an ideal solution for all classrooms.

To ensure you get the best out of our screens we give you free downloadable SPARK II software and a 90 day free trial of Project Flow software.

G-Touch Classic is available in 55" and 65".

Key Features & Benefits

Spark II Software

The ultimate classroom presentation software designed for ease of use is free with our Genee G-Touch screens.

Project Flow Software

Encourages student collaboration and enables teachers to automatically differentiate lessons. 90 day free trial*

Front Facing Speakers

The speakers are front facing to maximise the output of sound projected.

Connection & Bezels

Easily accessible connection ports and 4 section bezels to enable in situ repairs without having to return to base.

Upgradeable Built-In PC Option

All G-Touch models have the option to add a built-in PC. Our simple 'slide and secure' fitting options allow for easy upgrades.

Multi-Touch

With multi-touch technology several students are able to work and collaborate on the screen at once.

Anti-Glare

Our Classic screen is anti-glare enabling it be viewed in any environment regardless of the weather!
