TABLES

# GENEE APP STORE

## EDUCATIONAL APPS AT YOUR FINGERTIPS

You wouldn't buy a mobile device without an accompanying App Store, so why would you purchase a touchscreen without one? The Genee App Store is a great way of downloading educational content. It provides quick and easy access to a range of educational related applications. All content is thoroughly inspected and verified by our content team before it is released and key stage categorised. Powerful search engine allows the user to locate the apps by keywords. The Genee App Store has over 80 apps for every subject and key stage with more being added daily!

## G-TOUCH® TABLES

### INSPIRE FUN LEARNING WITH SUBJECT SPECIFIC CONTENT.

Children learn through Gamification creating an environment that encourages collaboration and team building.

The G-Touch® Tables are pre-loaded with a range of software that encourages numeracy, literacy, creativity, letter formation, music, art and much more. Many of these programmes are multi-touch, enabling several children to use the screen at the same time. This encourages children to develop important skills such as socialising, learning to take turns, working together, sharing and communicating.

G-Touch® Tables can be used in a horizontal position as a table, allowing more

students to interact together around the table. Alternatively, the tables can be tilted through 75° to enable students to use it more comfortably sitting down or if they are playing on their own. The Touch tables have been designed with wheels which makes it easy to move from room to room with the addition of individual brakes adds extra security and safety for children.

With 22 educational apps pre-installed on the G-Touch® Table including 6 of the Yellow Door stories at no additional cost!

### TILTING AND LOCKABLE SCREEN

The G-Touch® Tables can be tilted through 75 degrees before being locked in place. Making both viewing and touch more comfortable for children using it.

## PAINTED WITH ANTI-BACTERIAL PAINT

Available to purchase in a number of colours all of which are made from anti-bacterial paint, therefore they won't harbour germs and will be easily cleaned.

Designed for Early Years

GENEE PLAY SCREEN

Genee Play Screen 32"

Genee Play Screen 42"

The **Genee Early Years Play Screen Range** is a great addition to any Preschoolers right up to the end of Key Stage 1 and 2 classroom with objectives of engaging students using educational gaming software to inspire learning.

For wooden surround the colour options are:

**Standard**

Red

Green

Navy

**Optional**

Purple

Beech

Black

Please specify table surround colour when ordering.

## WHAT OTHER USE DOES THE TOUCH TABLES HAVE?

**TRAINING SESSIONS FOR STAFF BE ABLE TO DO PRESENTATIONS ON A LARGE DISPLAY.**

**DIGITAL SIGNAGE. SHOWCASE THE LATEST OFFERS AND CHILDREN'S WORK TO PARENTS.**

### **G-SAFE BUILT-IN**

**CREATE A TEACHER-CONTROLLED SAFE ENVIRONMENT FOR PUPILS!**

All G-Touch® Tables are supplied with our G-Safe platform, meaning that children can use the tables without being able to access any restricted websites or settings.

The G-Safe platform places all setting controls behind a PIN controlled area – this allows the teacher to take control of whitelists, blacklists, volume control and more. The settings can be easily changed depending on the circumstances but teachers can be safe in the knowledge that they can leave children to use the tables without supervision.

# HOW GAMIFICATION HELPS IN EARLY YEARS

Game elements such as immediate feedback and earning badges for completing the challenges successfully are strongly influential on increasing the students' drive in engaging in these games even within the walls of a classroom.

Additionally, the social component of gamified learning, whereby students gamify in groups, leads to loads of benefits on the brain function.

<https://www.theedadvocate.org/9-things-educators-know-gamification/>

The variety, frequency and complexity of the contingent responses the child can get from touchscreen devices offers different benefits from traditional toys and may generate heightened levels of cognitive activity.

Billington, C. (2016). How digital technology can support early language and literacy outcomes in early years settings: A review of the literature. London: National Literacy Trust.
