

Safe storage and charging for up to 32 full size laptops.

Manufactured in the UK from the highest quality materials and as with all CompuCharge[®] laptop charging solutions, made to comply with EN60950:2000. The Tabcharge[®] 32 has been designed as a compact, lightweight method of storing and charging any size of laptop.

Ergonomically designed to include large rounded corners, a more aesthetically pleasing look for the classroom which also prevents damage to walls or doors caused by collision.

Our simple "in shelf" cable management system allows for cables and AC adaptors to be stored safely. No more messy, untidy wires!!

All shelves are designed with the end user in mind, with large spacing between for ease of access. The shelving is fully ventilated, which completely removes any potential for the overheating problems that can be found in some of the lower quality products in today's marketplace.

"Multi-brand compatible", this means there is no restriction on the make or mix of laptops to be charged. For example a TabCharge[®] 32 could charge 32 different brands of laptop.

Outlets are fitted to the 2 way power management system inside the rear panel for secure access and connection, with 2 meters of mains cable. Please note that a twin 13 amp wall socket is required. Approximate dimensions 1,335mm high x 840mm wide x 560mm deep.

All products sold by CompuCharge[®] are supplied with a Lifetime Return to Base (RTB) Warranty.

Heavy duty construction, secure and designed for ease of use.

Choose your preferred colour option!

The standard door colour finish is grey. Blue, yellow, orange, red, green, black available on request at no extra cost.
