- Durable antimicrobial powder coated paint finish

Options

- Data Transfer – Update all your devices at once
- Timer – A configurable 7-day digital timer
- WAP – Internet access with wireless access point
- Docking Station - Secure your trolley to the wall for increased security

LapSafe.com

Construction

All units are manufactured from steel and painted in a durable antimicrobial powder coat paint finish. Rounded corners give the ChargeLite™ range a smooth exterior.

Devices are kept at an optimal temperature by encouraging maximum airflow through a series of ventilation holes. If you have our data transfer option fitted, thermostatically controlled fans are also included as standard.

Trolleys include recessed handles and high-quality 360° castors, providing easy-to-manage manoeuvrability from one location to the next. The two castors have brakes to lock the trolley in place. Desk, wall, and locker units can be securely fixed to a solid surface.

Power Management

- Overcurrent Protection
- Residual Voltage Protection
- Soft Start Power Management

Warranty

Lifetime Warranty for complete peace of mind.

What we also do

Self Service Smart Lockers

Here at LapSafe® we have designed a range of intelligent Smart Lockers that are both innovative and flexible, designed specifically to meet and exceed the demands of today's work and learning spaces.

So if you want to take self-service to that extra level take a look at what services our Smart Lockers can deliver; loaning of assets, drop off and collect, break/fix and hot lockers.

Our ONARKEN® cloud-based software is highly reliable, secure, and customisable. ONARKEN® is at the heart of our Smart Lockers and offers easy asset management with thousands of workflows, taking the headache away from deploying or managing assets.

Our ethos is to deliver on our promises, focus on quality and provide excellent customer service and support!
